PROFILE SUMMARY

Final-year Artificial Intelligence and Data Science Engineering student (CGPA: 9.0/10) with hands-on experience building cross-platform mobile apps, web applications, and low-code enterprise tools. Proficient in Python and SQL, with working knowledge of data visualization platforms (Power BI, Tableau) and cloud services (Microsoft Azure, AWS). Seeking a Machine Learning Engineer, Data Scientist, Data Analyst, or AI Research Intern role to apply strong programming, data-handling, and problem-solving skills to real-world challenges.

EDUCATION

East West Institute of Technology, Bengaluru 2023 - 2027
B.E. in Artificial Intelligence and Data Science Engineering
CGPA: 9.0 / 10.0 (through 3rd year)

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, Dart
Web Technologies: HTML, CSS
Databases: SQL, MongoDB
Tools & Platforms: Git/GitHub, Google Colab, Android Studio, Docker, OutSystems
Cloud & Data Visualization: Microsoft Azure, AWS, Power BI, Tableau

PROJECTS

- AI Powered Smart Farming Assistant** *Python, Machine Learning, IoT Sensors, Flask*
- Built an AI-driven assistant that helps farmers make crop, irrigation, and fertilizer decisions using real-time soil and weather data.
 - Trained machine learning models on soil, weather, and crop-yield datasets to recommend suitable crops and predict potential yield.
 - Integrated sensor and weather API data into a simple dashboard so farmers can track field conditions and receive actionable alerts.
- Smart AI Resume Analyser** *Python, NLP, Machine Learning, Streamlit*
- Built an AI tool that parses resumes and scores them against a target job description, highlighting strengths and gaps.
 - Applied NLP techniques to extract skills, experience, and keywords from unstructured resume text and compute a job-fit match score.
 - Generated personalized improvement suggestions and keyword recommendations to help candidates tailor resumes for specific roles.
- AI PDF ChatBot (RAG)** *Python, LangChain, LLMs, Vector Databases*
- Built a chatbot that lets users upload a PDF and ask natural-language questions about its content, with accurate, context-grounded answers.
 - Implemented a Retrieval-Augmented Generation (RAG) pipeline, chunking and embedding document text and storing vectors in a vector database for semantic search.
 - Connected retrieved context to an LLM to generate accurate, citation-grounded answers and reduce hallucinated responses.

CERTIFICATIONS & ACHIEVEMENTS

- Web Programming — Ethnotech Academic Solutions (Sep 2023 – Jan 2024)
- Web Technologies — Ethnotech Academic Solutions (Mar 2024 – Jun 2024)
- Data Science Using Python — Ethnotech Academic Solutions (Aug 2024 – Dec 2024)
- Advanced Java Programming — Ethnotech Academic Solutions (Feb 2025 – May 2025)
- Python for Data Science — NPTEL Elite Certification, IIT Madras (Top 2%, 85%, Jul – Aug 2025)
